An essay.

Should students have a long summer holiday or should terms be longer?

Most people think that students have a very long summer holidays and the time they spend outside the school must be shorter. Some people think that summer holidays have normal limits. Let's think about it.

First of all, studying is a very important part of people's lives. So ~~it~~ students must have enough time for studying. On summer holidays students don't go to school, so they don't receive any new knowledges. It is the main advantage of long terms: students will have more time to study. The second disadvantage is that students will have enough time to spend with their classmates. It is very important for people to talk to someone regularly.

But nothing is perfect and long terms have their disadvantages, too. For some students it will be ~~not~~ not enough time to rest. And the second disadvantage is that students will not have enough time to do leisure activities in summer. Many students do some sport on summer holidays and summer is only time when they can do it. It is very important for people to do sport and have a rest. Our body will not be healthy without a rest after our brains working at school.

In conclusion, I would like to say that the school terms should ~~not~~ be longer. Students have to have enough time for rest. They will not be very glad if their summer holidays ~~are~~ become shorter.
